

# Cabby (Mobile workstation)

"silence makes all the difference"

## Product Description:

CABBY is an innovative mobile workstation that allows the user to reconfigure his or her workspace on demand. Developed specifically for today's flexible work environments, Cabby consists of a worktops and a sound-absorbing partition in castor, so it can be easily moved by one person. Combining units can create a variety of configurations, from collaborative team-based arrangements to individual workstations.

## Available sizes.

The screen is available in two standard heights 1000 and 1600 mm, depending on the desired amount of privacy.
